EXPERIENCE

Product Designer & Web Developer • Sylq (former Qori)
Oct 2022 - today

I joined Qori, a startup, and led the design efforts that facilitated its merger with a larger company, ultimately resulting in the formation of Sylq. As the sole in-house designer, I assumed responsibility for the work previously handled by a major design agency. During this time, I focused on enhancing the user experience of existing products, as well as developing new ones.

Founder & CEO • Festivawl
April 2023 - today

Building a centralised mobile app for every festival in the world, helping people organise better and check up on lineups easier.

Freelance Product Designer & Web Developer
Feb 2019 - today

I helped many startups build their brand identity, website, and web/mobile app designs.

Product Designer & Web Developer • Coorest
Feb 2022 - Jun 2023

Built the website in WordPress and the Web App design in Figma.

Military Cop (Gendarme) • Romanian Gendarmerie
Oct 2017 - Jun 2022

Worked as a law enforcement officer in various cities throughout Romania, on diverse missions, including festivals, riots and city patrols.
